

# LE3000™

WHO IS WATCHING AND WAITING FOR YOUR NEXT SHIPMENT?

**\*\*\*LIMITED TIME\*\*\***  
"CALL FOR A FREE FLEET SECURITY EVALUATION TODAY"  
LUNAREYE CAN HELP YOU REDUCE LOSSES AND IN MANY CASES LOWER YOUR INSURANCE COSTS

**LE3000™** is the next generation self-powered miniaturized asset tracking and remote control telematics device with optional self-contained antennas. It uses the U.S. Military Global Positioning System to locate an asset, then reports the location using nationwide cellular phone communications, and also reports status of standard and optional sensors. **LUNAREYE** system users receive reports and control their assets via a secure Internet portal [www.portaleye.com](http://www.portaleye.com), two-way pager, or by phone. **LE3000™** operates on its own battery for extended periods depending on frequency of use. When installed on a vehicle or other powered asset, it works on the vehicle's battery or asset power and switches to its own battery if the external power source fails or is disconnected

*Optional Power-in-Lock™<sup>1</sup> mounts to roll-up and swing-out doors for trucks, trailers and ISO containers*

## FEATURES

- Reports asset location, speed and direction via the Internet or telephone on-demand.
- Geo-fencing provides an invisible fence around the asset each time it is parked and reports any violation to the asset owner. Owner selectable perimeters include: 1500ft., and 1, 5, 10, 15, 30, 50, 75 or 100 miles.
- If the asset has a sensor that triggers for one cycle, LE2000 reports the condition.
- Reports speeding at selectable alert levels: 55, 65, 75, or 85 mph exceeded for 30 seconds.
- Extended inactivity reports are available.
- Compatible with external timers via TTL or serial data.
- User configurable to Auto-Report location every five minutes, scaleable to once each day or when a state line is crossed.
- Automatic low battery alerts for the LE3000 battery or for an external power source such as a solar panel or vehicle power.

- Reduce Insurance Premiums
- Prevent Loss due to Down Time and Theft
- Monitor trip and fuel mileage
- Monitor and report light, sound, and door breach
- Remotely control internal door locks
- 2+ years of extended device power<sup>2</sup>
